

Finlytics – Estrutura da Tabela portfolios (SQL)

Backup da estrutura da tabela do projeto Supabase.

```
create table public.portfolios (  
  id uuid not null default gen_random_uuid (),  
  created_at timestamp with time zone not null default (now() AT TIME ZONE 'utc'::text),  
  name text null,  
  owner_id uuid null,  
  assets jsonb null default '{} '::jsonb,  
  performance numeric null default 0,  
  benchmark numeric null default 0,  
  risk_score numeric null default 0,  
  last_updated timestamp with time zone null default now(),  
  constraint portfolios_pkey primary key (id)  
) TABLESPACE pg_default;
```
